

Please tell us what you think of our concept proposals for Scapa Flow Visitor Centre and Museum

We are proposing a major refurbishment of the museum during 2017-2019, with the aim of restoring the current Pumphouse, Oil Tank and Romney Hut buildings, improving access and constructing a new extension to the Pumphouse to house the most fragile exhibits. This will allow us to display many items from the reserve collection which cannot be housed in the current buildings. The new build extension will also house improved visitor facilities. We welcome your views on the proposed project.

The existing museum

Although we know that there are many practical improvements that need to be made, feedback from visitors indicates that they currently enjoy their visits to the museum and rate it highly,
